Work Experience

System Administrator **Columbia, MD**
Jefe-Consulting LLC *June 2023 – Present*

- Deployed and promoted a **Windows Server** domain controller in Azure using Terraform and **Azure CLI**; configured the AD forest, **DNS**, and **Azure Key Vault** with managed identities and **RBAC** to eliminate hardcoded credentials.
- Administered **AD DS** for **400+** users across the full **IAM lifecycle** (provisioning, role-based access, secure offboarding), managed DSRM/disaster-recovery credentials, and enforced compliance by purging **30+** dormant accounts during quarterly access reviews.
- Designed and maintained **Organizational Unit** architecture and **Group Policy Objects** in **Active Directory**, structuring department-level OUs and enforcing password complexity, account lockout thresholds, and USB removable-storage restrictions across **300+** domain-joined workstations to harden security posture and meet policy compliance.
- Provisioned and managed **400+** user accounts, security groups, and group memberships using **PowerShell** and **Active Directory**, enforcing **role-based access control** and **least-privilege principles**.
- Automated administrative onboarding tasks by executing bulk user creation scripts via **PowerShell** against **Active Directory**, reducing manual account setup time across batches of **50+** new hire provisioning requests per cycle.
- Configured **Microsoft 365** and **Entra ID** in a hybrid environment, managing identity synchronization, **Seamless SSO**, and license allocation via Microsoft Graph **PowerShell** with automated Exchange Online mailbox provisioning.
- Enhanced **identity security** by migrating the tenant from security defaults to **Conditional Access**, executing a phased **MFA** rollout validated via sign-in logs with a tested break-glass exclusion, and enabling self-service password reset (**SSPR**) with on-premises writeback.
- Administered **IAM** operations in **Active Directory**, resolving **40+** daily access requests and performing root-cause analysis on recurring lockouts (e.g., stale cached credentials, misconfigured service accounts) to enforce domain security policies.
- Authored **SPL** queries and built a Windows Security Overview dashboard in **Splunk** to detect and visualize failed logins, account lockouts, after-hours activity, and authentication trends across **300+** enterprise Windows domain endpoints, supporting security operations and incident response.
- Managed the end-to-end incident lifecycle in **ServiceNow** tracking, prioritizing, and resolving hardware/software issues maintaining 100% **SLA** compliance and documenting all changes and resolutions to improve audit readiness.
- Integrated **PowerShell** with the **ServiceNow** API to automate status updates and queue management across 100+ active incidents and built knowledge base entries that improved first-call resolution for recurring issues.
- Conducted unauthenticated and credentialed vulnerability scans across enterprise **Windows Server** endpoints using **Nessus Essentials**, surfacing 80+ findings including missing patches, weak protocol configurations, and internal configuration weaknesses across production infrastructure.
- Remediated **Nessus**-identified vulnerabilities across **Windows Server** environments using **PowerShell**, disabling **SMBv1**, enforcing TLS 1.0 and TLS 1.1 deprecation via registry policy, and deploying security patches to close 65+ findings, validating all system-wide closures through post-remediation re-scanning.
- Produced executive summary and detailed vulnerability reports from **Nessus** scans documenting **CVSS** scores, remediation actions, and verification outcomes across **15** production systems, supporting security compliance reporting and audit evidence requirements for quarterly infrastructure security reviews.

Investment Analyst **Boston, MA**
Cambridge Associates *Jan 2022 - June 2023*

- Supported management of **$1B+** AUM across 13 endowments and foundations, analyzing portfolio and performance data to drive discretionary portfolio management and client recommendations.
- Built database-driven reporting workflows using **SQL** and **Power Query** to extract, validate, and model investment data, producing Excel-based portfolio exhibits that communicated risk profiles and performance trends.
- Conducted quantitative and qualitative due diligence on 16+ investment opportunities across public/private equity, private credit, and venture capital, synthesizing manager research and market analysis to support underwriting decisions.

Technology Services Support Associate **Towson, MD**
Towson University *Oct 2017 - Nov 2021*

- Provided Tier 1 help desk support in a mixed **Windows** and **macOS** environment, diagnosing and resolving endpoint software, network connectivity, and hardware issues across multiple university departments.
- Managed the IT service desk queue in **ServiceNow**, documenting troubleshooting steps, tracking asset details, and handling escalations to ensure timely resolution and **SLA** adherence.
- Delivered remote and on-site workstation support using **Microsoft Quick Assist**, **Remote Desktop**, and **Event Viewer** for OS configuration, data transfers, and hardware deployment.

Skills

Server Administration: Windows Server 2016/2019/2022/2025, Hyper-V, Active Directory Domain Services (AD DS), Domain Controllers, Group Policy (GPO), DNS, DHCP, NTFS Permissions, ACLs
Cloud Platforms: Microsoft Azure, AWS EC2
Automation & Scripting: PowerShell, Azure CLI, GitHub Actions (CI/CD Pipelines), Terraform
Identity & Access Management: Microsoft 365 / Office 365, IAM Lifecycle, RBAC, Hybrid AD Environments
Operating Systems: Windows 10/11, Windows Server 2016–2025, macOS, Linux (Debian, Ubuntu)
Networking & Remote Tools: RDP, QuickAssist, TeamViewer, DNS/DHCP Troubleshooting, TCP/IP,
IT Service Management: ServiceNow (ITSM), Incident/Problem/Request Management, SLA Compliance, ServiceNow Table API

Certification

CompTIA: Security+

AWS: AWS Certified Solutions Architect Associate (*In Progress*)

Education

Towson University

Bachelor of Science - BS, Business Administration, Minor in Economics

LaunchCode Software Engineering BootCamp
